PROFILE

M.Sc. student in Artificial Intelligence and Machine Learning at Blekinge Institute of Technology with hands-on experience applying Python-based machine learning to real and project datasets. Currently working in an industry collaboration developing image analysis, preprocessing, and pattern recognition workflows on industrial data. Experienced in exploratory data analysis, model evaluation, and investigating model behavior beyond surface-level metrics. Seeking opportunities in applied machine learning, data analysis, or computer vision within engineering or industry environments.

EDUCATION

M.Sc. in AI and Machine Learning

Karlskrona, Sweden

Blekinge Institute of Technology

Aug 2022 – Jun 2027

- Currently in the fourth academic year, with all coursework completed to date
- Relevant coursework: Machine Learning, Deep Learning, Computer Vision, Statistical Learning, Data Mining

EXPERIENCE

Machine Learning Intern

Karlskrona, Sweden

NKT

Jan 2026 – Present

- Develop image analysis workflows for industrial inspection data using Python
- Implement preprocessing and denoising techniques to improve data quality and model reliability
- Build and evaluate pattern recognition models in collaboration with engineers
- Analyse model performance and investigate failure case

Student Ambassador

Karlskrona, Sweden

Blekinge Institute of Technology

Aug 2025 – Present

- Representing the university at recruitment and outreach events
- Present study programs and student life to prospective students
- Deliver presentations to diverse audiences

Behavioral Support Specialist

Sävsjö, Sweden

Sävsjö Kommun

May 2022 – Present

- Support individuals with special needs in structured care environments
- Promote independence, safety, and inclusion through structured routines
- Collaborate with diverse teams and stakeholders

PROJECTS

Adversarial Attacks on Facial Recognition Systems: PyTorch, Computer Vision

Oct 2025 – Jan 2026 | [GitHub repository](#)

- Evaluated facial recognition robustness against digital and physical adversarial attacks
- Fine-tuned ResNet-18 and ResNet-101 and implemented FGSM, PGD, DeepFool, and patch attacks

- Tested defences including adversarial training and feature squeezing, adversarial training improved model robustness

Movie Revenue Prediction (TMDB): Python, Scikit-learn, XGBoost, NLTK

Oct 2024 – Jan 2025 | [GitHub repository](#)

- Built an end-to-end ML pipeline to predict revenue, profitability, and ratings from movie metadata
- Applied preprocessing, feature engineering, and title sentiment analysis
- Compared XGBoost, Random Forest, and KNN using stratified k-fold cross-validation, production budget was the strongest predictor

Manga Popularity Analysis: Python, Pandas, Statistical Analysis

Mar 2024 – Jun 2024 | [GitHub repository](#)

- Performed exploratory data analysis on a real-world manga dataset
- Cleaned data, handled outliers, and analyzed score, popularity, ranking, and chapter length
- Found popularity and ranking to be stronger indicators of success than chapter count

SKILLS

- **Programming & Data:** Python, SQL, Pandas, NumPy
- **Machine Learning & AI:** Scikit-learn, TensorFlow, PyTorch, Model evaluation, cross-validation, feature engineering, preprocessing pipelines
- **Data Analysis & Statistics:** Exploratory data analysis, Bayesian statistics, statistical testing
- **Tools & Platforms:** Git, GitHub, Linux, Docker, Jupyter, Microsoft Azure & Azure AI Studio, REST APIs, Excel, Visual Studio
- **Professional:** Technical communication, presentations, collaboration, structured problem solving, critical thinking

CERTIFICATIONS

- Microsoft Azure AI Essentials Professional Certificate, Microsoft (2026) [Credential](#)
- GitHub Professional Certificate, GitHub (2025) [Credential](#)

LANGUAGES

Arabic – Native proficiency | English – Full professional proficiency | Swedish – Full professional proficiency
